

How well does the health care system in **Hawaii**

work for people of different racial and ethnic groups?

In Hawaii, **AANHPI people** experienced the **highest health system performance**, scoring in the 95th percentile among all population groups nationally.

Hispanic people experienced the **lowest health system performance** in the state, scoring in the 74th percentile.

Compared to other states in the West region, Hawaii has less severe racial and ethnic health disparities.

Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Hawaii performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

Population by race/ethnicity (2022)

	Hawaii	West	United States
Total	1,383,303	55,654,296	328,403,052
AANHPI	626,000 (45%)	8,040,349 (14%)	19,862,655 (6%)
AIAN	1,153 (<1%)	298,316 (<1%)	1,688,543 (<1%)
Black	15,467 (1%)	2,632,074 (5%)	38,460,950 (12%)
Hispanic	149,891 (11%)	18,411,141 (33%)	62,818,758 (19%)
White	271,143 (20%)	22,938,988 (41%)	189,511,136 (58%)

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. West states include AK, CA, HI, NV, OR, WA. How well does the health system in Hawaii work for people from different racial and ethnic groups, and across different dimensions of care?

AANHPI

Hawaii ranks 5th of 31 states where calculation was possible, indicating health system performance for AANHPI people in the state was among the best compared to other states. Specifically:

- Health outcomes ranking: **25** (of 33) is worse than average
- Health care access ranking: **4** (of 34) is among the best
- Health care quality ranking: **3** (of 41) is among the best

AIAN

An overall ranking for AIAN people in Hawaii is not available because of insufficient data.

- Health outcomes ranking: insufficient data
- Health care access ranking: insufficient data
- Health care quality ranking: insufficient data

Black

An overall ranking for Black people in Hawaii is not available because of insufficient data.

- Health outcomes ranking: insufficient data
- Health care access ranking: insufficient data
- Health care quality ranking: insufficient data

Hispanic

Hawaii ranks 2nd of 47 states where calculation was possible, indicating health system performance for Hispanic people in the state was among the best compared to other states. Specifically:

- Health outcomes ranking: **20** (of 49) is better than average
- Health care access ranking: **1** (of 48) is among the best
- Health care quality ranking: **8** (of 48) is better than average

White

Hawaii ranks 6th of 51 states where calculation was possible, indicating health system performance for white people in the state was better than average compared to other states. Specifically:

- Health outcomes ranking: **2** (of 51) is among the best
- Health care access ranking: **12** (of 51) is better than average
- Health care quality ranking: **23** (of 51) is better than average

Hawaii Performance Data

	AIAN		AANHPI		Black		Hispanic		White	
	HI rate	US rate	HI rate	US rate	HI rate	US rate	HI rate	US rate	HI rate	US rate
Health Outcomes										
Deaths before age 75 from health care–treatable causes per 100,000 population	—	125	70	50	84	164	79	73	62	83
